# VISION

## Cinema

Ape X Machina is a fun retro-futuristic dystopian sci-fi story that we want to tell the world through visual (cinematic or TV) production. Inspired by nostalgic science fiction films from the '80s and '90s, Ape X Machina modernizes Mary Shelley's Frankenstein, a cautionary tale about the dangers of unchecked scientific progress.

## Equity

We're exploring legal pathways to provide our holder community equity ownership in the Ape X Machina cinema project through token verification technology. *Note: Due to securities regulations and business structuring complexities, we're unable to offer any further details regarding this topic. ## *STORY*

Forty six years from now, the human race loses a brutal war to a hostile artificial intelligence(AI). Soon after, the AI recognizes a fatal miscalculation: the nuclear explosions from the conflict caused irreparable damage to their power supply and resources.

In order to save its own species, the AI must prevent the great war from ever happening. It sends an army of cybernetic apes, Ape X Machina, back through time to teach mankind to coexist with machines.

Arriving in the early 1990s, armed with bright colors and a laid-back attitude, Ape X Machina set in motion their plan to integrate with humans of the past. Some see the robot apes as a sign of hope, and welcome the convenience of technological advancements that were inherently tied to Ape X Machina. Others, lead by skepticism and fear, create factions to resist the robots' mission.

Meanwhile, a defiant but bright teenager finds herself in the crosshairs of a rebellion. As the story progresses, villains emerge, battles ensue, and the teen develops an unlikely friendship with an Ape X Machina robot.

At its core, the Ape X Machina saga is a story of hope, courage, and the power of friendship.
